### **Course Description**

This 2 or 3 day workshop covers therapeutic evaluation & treatment of pediatric equinus gait ("toe walking"). It is common for the practitioner to feel lost when a child presents with a toe walking gait pattern. Both evaluation and treatment of these children are often frustrating for all involved and frequently results in inaccurate evaluation with ineffective intervention and poor achievement of results. Long term results are rarely achieved with either resultant surgical intervention and/or a reoccurrence of the problem. However, establishing a specific approach to treating this type of patient can be made less frustrating and more rewarding by asking the right questions and forming a deliberate approach. This course is excellent for alleviating a chaotic approach to the treatment of pediatric toe walking. Through an organized evaluation procedure, specific data will be used to direct the clinician to potential etiologies. Causes and appropriate intervention strategies are identified in order to utilize a systematic approach to developing an effective treatment plan.

Days 1 & 2 challenged the clinician to ask the right questions and form a systematic approach to the child who "toe walks." Chaos was replaced with clarity through organized management.

As requested by previous participants, Day 3 continues with additional information regarding: \*Primitive & postural reflexes: influence & mediation

\*Modification of shoes & orthoses: practical application

\*Vision: implications, assessment, & intervention

Previously introduced, the Act! (Assessment Criteria for Toe walking) is further utilized in a guided, evidence-based, detailed, decision making process to design treatment sessions & implement long term treatment plans. Clinical application skills are enhanced via the design of detailed evaluation & treatment plans by using case studies, videos & objective data. \*APPLIES TO OTHER MOVEMENT DISORDERS\*

### **Program Objectives**

### UPON COMPLETION OF THE COURSE, PARTICIPANTS WILL BE ABLE TO:

- IDENTIFY specific pathologies relevant to pediatric equinus gait.
- DEVELOP an organized evaluation approach and use the data to determine various etiologies of pediatric equinus gait.
- DISCUSS etiology-specific & age-appropriate assessment & management strategies for this population.
- APPLY effective examination, evaluation, intervention and treatment strategies to toe walking in the pediatric population.
- DESIGN an effective & individualized treatment plan for the pediatric patient.
- EXPLAIN the future consequences of incorrect intervention.
- GAIN confidence with the evaluation and treatment of pediatric toe walking.
